

The Ultimate Solution for Complete IT Visibility

Faddom provides agentless, automated dependency mapping for everything with an IP address, offering real-time updates and continuous visibility of all your servers and business applications. Unlike traditional tools, Faddom doesn't require any firewall changes, credentials, or agent installations—ensuring top security and efficiency. **With quick deployment and no impact on your resources, Faddom provides a cost-effective solution that scales effortlessly for businesses of any size.**

Application Discovery and Dependency Mapping Comparative Analysis

	Faddom Passive Agentless	Agent-Based	Agentless Active Scanning	Native/Freemium Cloud Tools
Security	No firewall opening, no credentials, no internet connection	Requires firewall openings and agent installation	Requires credentials, firewall opening, potential data leaks	Often requires constant Internet access, exposes data
Deployment	Fully deployed in under 60 minutes, automated	Complex, requires agents for every OS instance	Needs credentials, firewall openings, time-consuming in large environments	Usually easy but restricted to cloud environments
Time to Value	Immediate value seen as soon as deployment finishes	Delayed due to complicated setup	Medium-term due to deployment challenges	Immediate but limited by platform compatibility
System Resource Use	No impact on servers, fully passive	Can impact server performance, adds overhead	Can create network overhead, scanning impacts performance	Resource-intensive if not optimized for hybrid setups
Accuracy	Real-time updates, complete visibility, no blind spots	Accurate but limited to installed agents	Blind spots between scans, not real-time	Inaccurate for hybrid or multi-cloud environments
Scalability	Scales easily from a single server to large data centers	Difficult in segmented or large environments	Bottlenecks in large environments, limited by scanning range	Often limited to specific cloud platforms
Pricing	Best value with fair pricing per server. One license covers everything—ideal for any business size!	Often \$100K+ per year, costly for full environment mapping	High costs, especially in segmented environments	Free, but vendor lock-in and additional fees may apply

 **FAST**
Fully deployed within an hour.

 **SECURE**
No agents or credentials needed.

 **COST-EFFECTIVE**
Pricing that makes sense for you.

"Faddom has been instrumental in streamlining our business by providing real-time visibility into our complex IT infrastructure. The deployment was straightforward, and we saw immediate value. It's intuitive to use, which has promoted a more proactive strategy within our IT team. The application dependency mapping tool gives us the confidence to make changes without disrupting business operations."

Troy Clavel
CTO at First National Bank of Sioux Falls
